Securing Your Water Supply
Assembly Bill 3030 (Groundwater Management Act)

September 2002: Senate Bill 1938

The GWMP provides the framework for coordination of groundwater management activities among stakeholders. It identifies the basin management goals and objectives needed to guide efforts to effectively manage the groundwater basin as a safe and sustainable water supply.
March 2007
WMWD and City of Riverside entered into a Joint Study Agreement for the Riverside Basin

November 2008
A presentation on the components of GWMP was given to stakeholders of both Riverside and Arlington Basins

November 2008
The Board adopted the resolution of intention to prepare a GWMP

November 2010
The Board adopted a resolution of intention to draft a GWMP for the Arlington Basin
STATUS OF ARLINGTON BASIN GWMP

October 2011
A second stakeholder meeting was held to review the draft version of the Arlington GWMP

August 2012
A revised version of the Arlington GWMP was sent to stakeholders for review

September 2012
Comment period for revised draft GWMP closed

October 17, 2012
Resolution and Public Hearing to Adopt GWMP
## MANAGEMENT FRAMEWORK

<table>
<thead>
<tr>
<th>GOAL</th>
<th>OBJECTIVES</th>
</tr>
</thead>
</table>
| • To operate the groundwater basin in a sustainable manner for supply reliability and beneficial uses  
• Grant funding eligibility | • Maintain acceptable groundwater levels  
• Improve groundwater quality  
• Implement monitoring program |
<table>
<thead>
<tr>
<th>Elements</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Stakeholder involvement</td>
</tr>
<tr>
<td>• Mitigation of overdraft conditions</td>
</tr>
<tr>
<td>• Replenishment of groundwater extracted by water producers</td>
</tr>
<tr>
<td>• Identification of well construction policies</td>
</tr>
<tr>
<td>• Facilitation of conjunctive use operations</td>
</tr>
<tr>
<td>• Monitoring of groundwater and storage</td>
</tr>
<tr>
<td>• Construction and operation of groundwater contamination cleanup,</td>
</tr>
<tr>
<td>recharge, storage, conservation, water recycling, and extraction</td>
</tr>
<tr>
<td>projects</td>
</tr>
<tr>
<td>• Development of relationship with regulatory agencies</td>
</tr>
</tbody>
</table>
**Implementation**

- Establish an advisory committee for the basin
- Meet with stakeholders to plan basin operations
- Develop recharge facilities to increase basin yield
- Develop groundwater quality model
- Continue outreach and education
- Report on the Arlington GWMP every year
- Update on the Arlington GWMP every five years
