

Programmable Savings from Riverside Public Utilities

Programmable Thermostat Direct Install Program

Heating and cooling costs represent one of the greatest sources of energy consumption for many businesses. Programmable thermostats can ensure energy efficiency and reduce costs.

Programmable thermostats provide:

- Different settings for weekdays and weekends
- Multiple daily settings
- Customized heating and cooling programs for only the hours that you need it

By utilizing programmable thermostats, businesses can dramatically reduce heating and cooling costs by eliminating wasted hours of operation.

And now, Riverside Public Utilities (RPU) is offering **FREE** Programmable Thermostat installations for qualifying commercial energy customers (some restrictions apply).
