

## Water for Riverside's Future

For over 100 years, Riverside Public Utilities (RPU) has delivered safe, reliable, high-quality drinking water to its customers.

Our water supplies come from underground sources fed by rain and snow falling in the San Bernardino Mountains and local foothills. Over the years, RPU has constructed facilities that allowed us to increase these water resources to become completely water independent.

This independence allows RPU to provide our customers with quality service at lower rates, as we are free from having to purchase higher-cost imported water supplies.

In an effort to ensure these supplies will continue to serve our customers' needs for the next 100 years, we have developed a Water Supply Plan. It is designed to expand additional local water supplies in a cost-effective and sustainable manner, by building more recharge basins and utilizing recycled water for landscaping.

For more information on this plan go to:

## do you know?

It's important to conserve water whenever you can. On average, here's how much water your everyday activities use.

- Landscaping (350 gal./day)
- Car Washing (150 gal.)
- Shower (40-70 gal. / 10 min.)
- Bath (20 gal.)
- Running the Tap (5 gal. / min.)

## conservation corner

You can reduce outdoor water use by as much as 20% and receive a \$200 rebate for installing a Weather Based Irrigation Controller (WBIC) that adjusts your watering schedule based on weather conditions. Visit [GreenRiverside.com](http://GreenRiverside.com) to find out more.
